

Installation Instructions & Use Recommendations

FMS Accessories – Lidar Gun Holsters – 2026+ Harley Mount

These instructions must be read carefully and thoroughly **before** beginning work. FMS Solutions, LLC accepts no liability for damage caused by failure to observe the installation instructions or use recommendations.

Installation of this accessory does not change the factory specified load limits for the motorcycle.

FMS Accessory Lidar gun holsters are made from powder-coated heavy duty aluminum to resist corrosion. The special Road Glide mounting bracket is produced from powder-coated aluminum and is connected via five (5) M5 x 12 mm studs with flanged nuts. This does enable the case or mounting bracket to be replaced in the event either becomes damaged.

Mount the unit to the Harley Davidson RH siren speaker mount. First, remove the two 1/4-20 x 1.25" Phillips bolts securing the siren speaker to the mount. Slide the speaker away from the outside area of the mount. Place the M8 x 16 black carriage bolt (provided in the kit) through the lower slot. This will align with the square hole in the mounting bracket.

Place the bracket square hole over the protruding carriage bolt head, then add the flat washer and M8 nut. Tighten softly to take-up slack.

Slide the siren speaker back into position. Insert the two provided 1/4-20 x 1.25" allen head bolts through the bracket and engage the speaker. Just get each bolt started. There is "Vibratite" on the bolt head, so it will provide a little resistance. Continue to snug all three bolts, sliding the mounting bracket inward and against the back of the speaker frame, reaching alignment on all three points before tightening.

Apply blue Loctite on the Carriage bolt before final tightening. Tighten the other two main bolts securely. Place plastic cap over the nut for a finished look.

Maintenance Requirements:

The keyed lock attached to the holster will require periodic lubrication. The frequency of that lubrication will depend in large part on the environmental conditions and frequency of washing. It is best to use a light penetrating oil such as WD40 or similar.

Keep the holster and mounting bracket clean from bugs and other road debris as you would your motorcycle. Clean with soap and water – avoid harsh chemical cleaners as they could cause corrosion of the lock mechanism. The powder coating inside the holster may wear off at contact points which is normal. No adverse effects will occur. Stone chips in powder coating should be touched-up to seal the opening to avoid corrosion at the chip.

Feedback: Thank you for your purchase and we welcome your feedback as we too want to make every accessory exceed your expectations. Report any comments, suggestions, problems or concerns to FMS Solutions, LLC at info@fmsaccessories.com.

FMS Solutions, LLC Limited Warranty

FMS Solutions, LLC warrants to the first retail purchaser of new FMS Accessory products, to be free from defects in materials or workmanship, for a period of three (3) years from the original date of purchase as noted on the FMS Solutions, LLC invoice or original dealer invoice, except for paint and powder-coated finishes, which are warranted for the first 12 months only. LED lights from Fenix, Inc., Code 3, Inc. and Littlite are covered for 5 years by their manufacturer's respective warranties – processed through FMS Solutions, LLC.

This warranty extends only to the FMS accessory and does not include: damage caused by accidents or abuse; incorrect installation; labor to diagnose, remove, repair or replace; any consequential damage or loss of use. Any FMS Accessory suspected of being defective should be returned to FMS Solutions, LLC along with a copy of proof of purchase and warranty request form available on the FMS website. FMS Solutions, LLC will determine if the FMS accessory has a warrantable defect, and if so, will repair or replace the item and return it to the sender without charge. The decision to repair or replace said item is solely the prerogative of FMS Solutions, LLC.

Note: Police motors can operate in a very rough environment since police motors are a "tool". They can be dropped, knocked-over, etc. without concern as the officer has a job to do and determines what is necessary at any given moment. Warranty is for defects in materials or workmanship. Therefore, the ability of an item to become broken or damaged does not mean it is warranty ... it just means it is broken or damaged and in need of repair or replacement. No manufacturer warrants their products to be indestructible. Any questions should be directed to info@fmsaccessories.com.
