

Installation Instructions & Use Recommendations

FMS Accessories – Zebra / Tall Ticket Box Mount

These instructions must be read carefully and thoroughly **before** beginning work. FMS Solutions, LLC accepts no liability for damage caused by failure to observe the installation instructions or use recommendations.

Installation of this accessory does not change the factory specified load limits for the motorcycle.

The RH mount for the Zebra / Tall Ticket Book Box comes with a hardware package shown at right. This mount is designed to be used with or without a Lidar gun holster mount. If factory BMW driving lights are not installed, an additional M6 x 30 bolt and nut are provided to secure the support bracket to the driving light mount.

This mount comes separate from the box it supports, because we don't know what combination of mounts you have.

Depending upon the style and length of the Lidar holster, the mount is indexed with multiple holes to enable mounting the Zebra box or tall ticket book box as close as possible to the Rider or Lidar holster (Zebra only requires four of the six mounting studs to secure it). We suggest dry fitting the bracket to determine where your box should be attached. You will want to attach the box to the bracket prior to final assembly (it is very difficult to secure the nuts when the bracket is in the final position).

For illustrative purposes, we are showing the mounting points without the Zebra / TTB box installed.

Three M5 x 14 flanged Torx bolts and three M5 flanged serrated nuts are provided if the mount is attached by itself. Otherwise, mount it using the bolts from the Drop Blocks or Lidar mount.

Secure the loop clamp around the protection bar. Use the provided M5 x 14 Torx bolt + M5 flanged Nylock nut to secure the clamp. It works best to remove the rubber cover on the clamp. You will need to “tune” it a little but it will fit.

The support strut runs from the BMW factory driving light mount, up to the hole on the inner side of the mount.

Note: If the motorcycle is not equipped with BMW factory driving lights, an M6 x 30 bolt and nut are provided in addition to the standard hardware package.

Secure the upper mount with the provided M5 x 10 flanged Torx bolt. Once all mounting points are connected and level, tighten the bolts securely.

The supports on either side of the mount should make it very sturdy.

Mount your Zebra or TTB box to the bracket prior to final assembly. Either product will be supplied with the appropriate hardware. Zebra box uses M5 x 10 (inner side) and M5 x 12 (outer side) self-clinching studs, coupled with M5 serrated flange nuts, to secure the box to the bracket. TTB box uses M5 x 12 flanged Torx bolts and M5 serrated flange nuts.

Feedback: Thank you for your purchase and we welcome your feedback as we too want to make every accessory exceed your expectations. Report any comments, suggestions, problems or concerns to FMS Solutions, LLC at info@fmsaccessories.com.

FMS Solutions, LLC Limited Warranty

FMS Solutions, LLC warrants to the first retail purchaser of new FMS Accessory products, to be free from defects in materials or workmanship, for a period of three (3) years from the original date of purchase as noted on the FMS Solutions, LLC invoice or original dealer invoice, except for paint and powder-coated finishes, which are warranted for the first 12 months only. LED lights from Fenix, Inc., Code 3, Inc. and Littlite are covered for 5 years by their manufacturer's respective warranties – processed through FMS Solutions, LLC.

This warranty extends only to the FMS accessory and does not include: damage caused by accidents or abuse; incorrect installation; labor to diagnose, remove, repair or replace; any consequential damage or loss of use. Any FMS Accessory suspected of being defective should be returned to FMS Solutions, LLC along with a copy of proof of purchase and warranty request form available on the FMS website. FMS Solutions, LLC will determine if the FMS accessory has a warrantable defect, and if so, will repair or replace the item and return it to the sender without charge. The decision to repair or replace said item is solely the prerogative of FMS Solutions, LLC.

Note: Police motors can operate in a very rough environment since police motors are a “tool”. They can be dropped, knocked-over, etc. without concern as the officer has a job to do and determines what is necessary at any given moment. Warranty is for defects in materials or workmanship. Therefore, the ability of an item to become broken or damaged does not mean it is warranty ... it just means it is broken or damaged and in need of repair or replacement. No manufacturer warrants their products to be indestructible. Any questions should be directed to info@fmsaccessories.com.
