

Installation Instructions & Use Recommendations

FMS Accessories – Zebra Printer Box 2026 RT-P

These instructions must be read carefully and thoroughly **before** beginning work. FMS Solutions, LLC accepts no liability for damage caused by failure to observe the installation instructions or use recommendations.

Installation of this accessory does not change the factory specified load limits for the motorcycle.

FMS Accessory Zebra printer boxes are made from powder-coated heavy duty aluminum to resist corrosion. The mounting bracket is produced from powder-coated steel and connect to the 3-point mount used by the Lidar holster mount (no longer attaches to the Lidar holster mount—see instruction with bracket).

Attach the provided Velcro to the printer and the box to secure the printer from vibration / damage.

As noted in the bracket instructions, test fit it first to determine where to attach the box, based on Lidar holster size, etc. Once determined, attach the box to the bracket. Zebra box – M5x12 studs on outside / M5x10 studs on inner side. A support mounts to the driving light mount, while an outer clamp provides support from the protection bar.

Installing Optional Key Lock:

Position the lock template on the forward side (only mount on rear side if combined with Lidar holster – check for key clearance). Using the template below, determine where on the box the lock pin should protrude to capture the printer / keep it from being removed. From that point, mark the three holes that need to be drilled. The critical size is 5 mm (13/64”) for the self-clinching studs. The hole for the lock pin can be from 17/64” to 5/16” (not critical).

Drill the holes using the stated bit sizes and debur the holes.

Insert the self-clinching studs from inside to outside and secure the lock unit to the housing with M5 washer-head nuts provided.

Maintenance Requirements:

Keep the Zebra printer box and mounting bracket clean from bugs and other road debris as you would your motorcycle. Clean with soap and water – avoid harsh chemical cleaners as they could cause corrosion. The powder coating inside the Zebra printer box may wear off at contact points which is normal. No adverse effects will occur. Touch-up stone chips on the leading edge with touch-up paint to protect powder-coated finish.

Lubricate lock unit with WD40 or similar water-displacing lubricant spray as needed.

Feedback: Thank you for your purchase and we welcome your feedback as we too want to make every accessory exceed your expectations. Report any comments, suggestions, problems or concerns to FMS Solutions, LLC at info@fmsaccessories.com.

FMS Solutions, LLC Limited Warranty

FMS Solutions, LLC warrants to the first retail purchaser of new FMS Accessory products, to be free from defects in materials or workmanship, for a period of three (3) years from the original date of purchase as noted on the FMS Solutions, LLC invoice or original dealer invoice, except for paint and powder-coated finishes, which are warranted for the first 12 months only. LED lights from Fenix, Inc., Code 3, Inc. and Littlite are covered for 5 years by their manufacturer's respective warranties – processed through FMS Solutions, LLC.

This warranty extends only to the FMS accessory and does not include: damage caused by accidents or abuse; incorrect installation; labor to diagnose, remove, repair or replace; any consequential damage or loss of use. Any FMS Accessory suspected of being defective should be returned to FMS Solutions, LLC along with a copy of proof of purchase and warranty request form available on the FMS website. FMS Solutions, LLC will determine if the FMS accessory has a warrantable defect, and if so, will repair or replace the item and return it to the sender without charge. The decision to repair or replace said item is solely the prerogative of FMS Solutions, LLC.

Note: Police motors can operate in a very rough environment since police motors are a "tool". They can be dropped, knocked-over, etc. without concern as the officer has a job to do and determines what is necessary at any given moment. Warranty is for defects in materials or workmanship. Therefore, the ability of an item to become broken or damaged does not mean it is warranty ... it just means it is broken or damaged and in need of repair or replacement. No manufacturer warrants their products to be indestructible. Any questions should be directed to info@fmsaccessories.com.

Verify width as some printers may shrink the template image.
